

WALL STREET

The stock market opened with moderate irregularity, a number of issues making substantial gains, while others receded under a lessening of demand. The copper stocks were strong, Utah making an initial gain of 1/4 to 3/4. While material fractional advances were made in Amalgamated Copper and Anaconda, nearly all the other stocks in which there is international interest showed some amount of recession. Steel, which opened 1-1/2 higher at 11-1/2, yielded 5-8, and fractional losses were recorded in Southern Pacific, Great Northern and Canadian Pacific declined 1/4 to 1/2. After the first fifteen minutes aggressive buying appeared in many issues, causing a resumption of the upward movement, which was most pronounced in Union Pacific; 25,000 shares were supposed to have been bought for one interest, raising the price to 101-1/4 from 101-1/2. American Can was strong, rising two and a half points from last night's closing. United States Steel touched 54.

An important factor in determining the tone was the appearance of leading banks, like the National City and Chase National, as offerers of time money, chiefly sixty-day loans at 4-1/2 per cent.

A sudden selling movement occurred about 11:30 caused by heavy selling orders from London, and helped by the room traders, Canadian Pacific, Union Pacific, United States Steel and American Can lost from 1 to 3 points. New Haven stock was weak, selling off 1/2 point from last night's closing price. In the early part of the afternoon business fell off, but gradually increased in the last hour when nearly all the stocks that had sold off in the morning session regained the greater part of their loss and closed strong with few exceptions at higher prices than obtained at the close of yesterday. Total sales, 517,700.

The Closing Quotations.
